

1. In order to run CUMBIA you need to have installed Matlab in your computer.
2. Save the folder “CUMBIA” in your Local Disk (C:). This folder should contain the Matlab files: CUMBIACIR.m, CUMBIARECT.m, manderconf.m, manderun.m and steelking.m; it should also contain the folder “models”.
3. Open Matlab.
4. From the Matlab browser open the program CUMBIACIR.m or CUMBIARECT.m
5. Fill in the input data.
6. Run the program.
7. The output file will be saved in C:\CUMBIA

For examples and the theoretical background behind these codes please refer to “CUMBIA Theory and user Guide”
